

## Features

### Device Features

PowerGuard high-sensitivity door type metal detector, independent LED light bars lined up along the door indicate the position of the threatening object on the person passing by. This detector has 24 detection zones and there is no dead zone. In general, there are 100 steps of sensitivity adjustment and these 24 zones have sensitivity settings between 0-99 separately. The electronic unit is protected against external factors in the locked compartment on the detector.

## Standard Features

Sensor counting people passing by

Audible, illuminated and alphanumeric display metal density indicator

Password to login to programming

## Suitability

People with a pacemaker, pregnant women or magnetic storage (USB ,CD...)electronics Does not damage material

The device complies with EEC 89/336 It has CE, ISO 9001:2008

High reliability

7/24 suitable for uninterrupted operation

## Standard Features

Indoor and Outdoor Use

18 Detection Zones

Water Resistant Construction (IP55)

High Sensitivity Setting

High performance

LCD Display

2 LEDs in Hazardous Substance Detection warning with light

Sound and Light Alarm

Dimensions	930 (Width)30mm (Depth) 22300mm (Height)
Operating Temperature	-20°C / +50°C 95% RH
Strength	15 W
Sensibility	100 Steps of general sensitivity adjustment 0-99% step of the zones separately sensitivity setting
Net Weight	53.5 kg
Alarm	Audio and Visual
Frequency Selection	Automatic
Migration Per Minute Its	60 People
Guarantee	2 years
