

# SMART UHF OGS Barrier Systems (6 - 12 mt)

Smart UHF OGS (6 MT)	2 Antennas, Pole Mounting Apparatus, 1 Piece Software, 1 Piece Dual Parking Lot Control Panel (Recommended for Parking Lot)
Smart UHF OGS (12 MT)	2 Antennas, Pole Mounting Apparatus, 1 Piece Software, 1 Piece Dual Parking Lot Control Panel
T4 Barrier	(Optional)
Loop	(Optional) Single Duct
Antenna Mast	(Optional)

## Fields Of Application

UHF technology used in international projects Its feature is long distance detection of labels and cards. UHF Technology integrated with barrier automation systems works as Parking system to be controlled by software desired, "Smart UHF OGS" system is used. In this system extra control, button, card for opening the barrier used that does not require the use of a reader or that the security guard It allows the barrier to open without waiting for it to open and enters. All exiting vehicles are controlled by software.

## Use

Smart UHF OGS System as 6 meters and 12 meters is working. Before the cards or tags are given to the vehicles, all the cards or tags are introduced to the antennas. The sticker is affixed to the windshield or the card is placed so that it is visible on the windshield. to vehicle antenna approach, the antenna communicates with the reader and detects the card or tag. detecting it, it sends the open command to the barrier and the barrier opens and the vehicle goes inside

## Software

- Transactions performed with the software;
- Vehicle entry and exit authorization procedures,
- Instant, hourly, daily, weekly, monthly reporting operations
- The number of vehicles inside
- Antipassback feature

## Material

In systems with a detection distance of 6 meters or 12 meters Mounting apparatus for easy mounting of the antenna to the mast, software, 1 x car parking control panel and 2 x UHF antennas Supplied as a set. Antenna mast, boom barrier and barrier accessories are available as an option. Electric The system, which can be connected to the UPS optionally, can continue its function. The "Smart UHF OGS" system, which is a fast and reliable solution, adequate apartments, sites, public and private institutions, hospitals, It can be easily used for universities and parking lots.

## Content

- 1 Car Parking Dual Control Panel
- 2 x UHF Antennas
- 1 Piece Of Software
- Pole Mounting Apparatus
- Antenna Mast (Optional)
- Boom Barrier (Optional)
